R.R.I.M.

LOCATION. The Institute's offices and laboratories are at the third mile, Jalan Ampang, Kuala Lumpur and are open from 8 a.m. to 12.45 p.m. and from 2 to 4 p.m. through Mondays to Fridays and from 8 a.m. to 12.30 p.m. on Saturdays (except public holidays).

EXPERIMENT STATION AND FACTORY. The R.R.I.M. Experiment Station and Factory are situated at Sungei Buloh, 16 miles from Kuala Lumpur, on the Kepong–Kuala Selangor road. Visits to the Station may be made by prior arrangement. There is a guest house.

CORRESPONDENCE. All correspondence should be addressed to *The Director, Rubber Research Institute of Malaya, P.O. Box 150, Kuala Lumpur, Malaysia.* However, special enquiries may be marked for the attention of Divisions and individual officers. The telegraphic address of R.R.I.M. is *'SEARCHING, KUALA LUMPUR'* and the telephone number is *KL 647921* (10 lines). Senders' addresses should be written legibly on the outside of all packages; advice of their despatch by letter or telegram is requested.

PROHIBITED PLANT SPECIMENS. Plant Importation Rules prohibit the import into Malaysia of any part of a plant (living or otherwise), unless accompanied by a permit issued by the Director of Agriculture. Permits are not issued in respect of any diseased plant or plant pest and all materials imported in contravention of the Rules are destroyed without examination. Hence, any person outside Malaysia who desires R.R.I.M.'s advice on any matter which may require examination of specimens should first ascertain whether such material could be imported.

ADVICE. Rubber producers in Malaysia, may seek R.R.I.M.'s advice in regard to their special problems. Visits may be made by the Institute's research and advisory staff to estates and holdings in Malaysia as convenient and by special arrangement only. The only visits for which charges are normally made are those of our clone identification inspectors. Prior arrangements should be made regarding interviews.

PUBLICATIONS. Subscriptions to any or all of R.R.I.M. publications (including the *Journal, Planters' Bulletin* and *Reports)* may be entered by placing an order for the publication(s) together with the full remittance *in advance* for the exact amount payable for the items required, including postage. The subscriber will then receive the publications as and when they are published. No discount is given for any purchases. Lists of R.R.I.M. publications are available on request.

PLANTERS' BULLETIN

OF THE RUBBER RESEARCH INSTITUTE OF MALAYA

Kuala Lumpur 1970 Main Contents

Planters' Bulletin 106

	Page
Editorial: Plant Diseases and Weather	1
Mites	3
Secondary Leaf Fall	7
Intensive Tapping of Older Rubber	12
Vulcanised Contaminants in Raw Natural Rubber	20
Notes, News and Views	23

Planters' Bulletin 107

Editorial: Underestimate in 1961	31
R.R.I.M. Clonal Seedling Trials: Fifth Report	33
Planting Materials Used in West Malaysia 1968	42
Review of Modern Hevea Clones: 1, Clone RRIM 600	49
Notes, News and Views	65

Planters' Bulletin 108

Editorial: Improving NR's Competitive Position	69
Identification of Plants on Malayan Rubber Estates: Plates 89–96, Epiphytes	71
RRIM 700 Series Clones Trials (Second and Third Selections): Third Report	83
Leaf Sampling for Disorder Diagnosis and Avoidance	92
Notes, News and Views	97

Planters' Bulletin 109

	Page
Editorial: Phytophthora and the Phytopathologist	103
Black Stripe	105
News Names for Old Diseases and Pests	111
Review of Modern Hevea Clones: 2, Clone GT 1	113
Performance of Clones in Commercial Practice: Sixth Report	135
Notes, News and Views	147

Planters' Bulletin 110

Editorial: Planters' Conference 1970 — Opening Address	159
Economics of Field Collection	164
Malaysian NR in the Seventies: A Forecast of Production Trends	186
New Presentation Rubbers: SMR Market Reaction and Future Requirements	200
An Approach to an Ideal Tyre Rubber	210
Consumer Requirements for NR in the Seventies	237
Changes in the SMR Scheme	249
Panel Discussion: Production Advances and Consumer Requirements	264

Planters' Bulletin 111

Editorial: Planters' Conference 1970 — Review	279
Tapping Systems for Young Rubber	285
Use of Latex Guide Strings with High-Level Tapping	316
Economics of Tapping Systems	324
A Radical Approach to Exploitation	342
The Search for New Stimulants	351
Field Trials with Ethrel	366
Panel Discussion: Integration of New Stimulation Techniques with Exploitation Practice	387
Index 1970	399
